Specialized Treatments at Sahaj Hospital

Sahaj Hospital offers advanced orthopedic treatments supported by modern technology and experienced specialists — delivering precision care and faster recovery.

Knee Replacement & Arthroscopy

Total knee replacement and minimally invasive arthroscopic procedures for lasting relief.

Spine Surgery

Expert surgical and non-surgical solutions for spine disorders and deformities.

Hip Replacement

Advanced total hip replacement restoring mobility and eliminating chronic pain.

Trauma & Fracture Care

Rapid response fracture management and deformity correction with modern techniques.

Expert Care for Common Orthopedic Problems

From degenerative conditions to acute injuries, Sahaj Hospital treats the full spectrum of musculoskeletal conditions with precision and compassion.

1)

Osteoarthritis & Chronic Joint Pain
degenerative wear and persistent discomfort

2)

Sports Injuries & Ligament Tears
ACL, meniscus, rotator cuff

3)

Spine Disorders
disc herniation, stenosis, back pain

4)

Fractures & Trauma
complex breaks, accident injuries

5)

Bone & Muscular Infections
osteomyelitis, soft tissue infections

6)

Deformities & Mobility Issues
congenital and acquired conditions

Early diagnosis and timely treatment can prevent complications and significantly improve long-term mobility and quality of life.

 Don't wait — persistent pain is your body's signal. Seek evaluation before the condition worsens.

Advanced Solutions for Improved Mobility

Modern orthopedic procedures at Sahaj Hospital focus on precision, faster recovery, and improved outcomes. Minimally invasive techniques reduce pain and support quicker rehabilitation.

Total Knee & Hip Replacement

State-of-the-art joint replacement with advanced implants for natural movement and long-lasting results.

Knee & Shoulder Arthroscopy

Minimally invasive keyhole surgery for diagnosis and treatment — less pain, faster recovery.

Joint Preservation Techniques

Advanced procedures designed to save your natural joint and delay or avoid replacement.

Is Orthopedic Consultation Right for You?

Seek medical evaluation if pain, stiffness, or mobility issues are affecting your daily activities. You don't have to live with discomfort.

Persistent Joint Pain

Chronic pain in knees, hips, or shoulders that limits daily activities.

Sports Injuries

Ligament tears, fractures, or injuries from physical activity.

Back or Neck Pain

Spine-related discomfort affecting posture, sleep, or mobility.

Arthritis & Stiffness

Joint swelling, stiffness, or reduced range of motion.

Your Treatment Journey at Sahaj Hospital

Every patient receives a personalized, step-by-step care pathway designed to restore mobility and improve quality of life through evidence-based medicine.

Our patient-centered approach ensures you are informed, supported, and cared for at every stage — from first consultation to full recovery.
